

Tobin Carlton Van Buizen

Analytic Professional

E: tobycvb@gmail.com | M: 0490 857 067 | tobincarltonvanbuizen.com

PROFESSIONAL SUMMARY

First Class Honours graduate in Mathematical Sciences and Statistics who commenced university at 15 and completed a double degree at 20 at the Australian National University, specialising in algebraic topology. Currently delivering analytics and Power BI decision support solutions: leading project delivery end to end, presenting findings to SES Band 1 and 2 executives, and translating complex quantitative outputs into practical business decisions. Three years' prior experience governing enterprise scale data and reporting in the Australian Public Service, and seven years' experience teaching and tutoring mathematics. Combines rigorous quantitative training with auditable reporting pipelines, workflow automation, and stakeholder engagement across all levels. Energetic, reliable, and eager for fast paced professional challenges where rigorous thinking meets real world outcomes.

KEY COMPETENCIES & SKILLS

- **Project Delivery & Stakeholder Engagement:** End to end delivery from requirements gathering through analytical design and build to deployment; executive briefing and presentation (SES Band 1 and 2); iterative, user led delivery; engagement across operational, technical and senior leadership levels.
- **Financial & Stochastic Modelling:** Honours level training in stochastic analysis with financial applications: option pricing, hedging and the Black-Scholes framework, Lévy and Poisson stochastic integration, Malliavin's stochastic calculus of variations, investment optimisation under uncertainty.
- **Quantitative & Statistical Methods:** Generalised linear modelling, Bayesian and statistical inference, exploratory and diagnostic analysis, classification and risk logic, scenario and sensitivity analysis, time series and stochastic process modelling.
- **Data Governance & Quality:** Enterprise scale CMDB governance in ServiceNow (~270k assets, ~1.3m configuration items); consolidation of disparate legacy sources into a trusted single source of truth; profiling, validation and reconciliation; data quality metrics and audit ready controls; user adoption and legacy to target state transition.
- **Data Engineering, Reporting & Automation:** Power BI, Power Query, SQL, advanced Excel; Python, R, MATLAB, HTML, CSS; PowerShell and Excel VBA automation pipelines; automated scheduling and dashboards.
- **Communication, Teaching & Training:** University teaching from first year to Honours level; marking, model solutions and structured written feedback; private tuition; technical documentation; workplace supervision; public presentation of technical material.
- **Productivity & Tooling:** Agile sprints, Jira, Confluence, ServiceNow, ArcGIS, Microsoft Excel, $\text{\LaTeX}$.

PROFESSIONAL EXPERIENCE

Evolve Capabilities

Data Analyst

Canberra, ACT

Jan 2026 – Current

- Leading end to end delivery of an operational geospatial analytics and Power BI decision support capability, from requirements gathering and stakeholder engagement through analytical design and build to deployment.
- Presenting findings directly to SES Band 1 and 2 executives, translating complex analytical outputs into decision ready insights on the practical business value the work delivers.
- Building automated ingestion, transformation, validation and quality assurance pipelines in PowerShell, Power Query and Excel VBA to consolidate complex multi-source datasets, surfaced through interactive web embedded Power BI dashboards for map based decision support.
- Supporting governance and transformation initiatives with executive reporting that converts delivery status, maturity and currency into measurable datasets for tracking progress and directing effort.

Australian Public Service (APS)

Configuration Management & Reporting Service Delivery Manager

Canberra, ACT

Feb 2023 – Jan 2026

- Governed a ServiceNow configuration management database of ~270k assets and ~1.3m configuration items, a sub-register to the financial asset database, maintained to audit ready standard at enterprise scale.
- Consolidated disparate legacy sources (private Excel workbooks, legacy registers, web deployed databases) into a trusted enterprise single source of truth through profiling, validation and reconciliation.
- Built automated, scheduled dynamic reporting using ServiceNow, SQL, Python and Power Query, replacing manual processes with auditable, reproducible analytical outputs.
- Implemented data quality metrics surfacing trends, gaps, anomalies and interdependencies, enabling risk based analysis such as downstream business system exposure to end of life infrastructure.
- Translated complex operational data into self service interactive maps and dashboards, enabling non-technical stakeholders to access decision ready insights without analyst intervention.

- Assisting students of all levels in the [MSI Drop-In Help Centre](#).
- Tutoring for undergraduate and postgraduate students across various classes for the following courses:
 - [Discrete Mathematical Models \(MATH1005/MATH6005\)](#)
 - [Advanced Mathematics and Applications 1 \(MATH1115\)](#)
 - [Introduction to Mathematical Thinking: Problem-Solving and Proofs \(MATH2222/MATH6222\)](#)
 - [Algebraic Topology Honours \(MATH4204\)](#)
- Tutoring First Nations students through the Tjabal Indigenous Higher Education Centre, providing individual mathematics support that starts from each student's strengths and ways of understanding.
- Teaching students to recall, invent, interpret examples of motivation for mathematical constructs used in discrete mathematics as models of processes in the world.
- Evaluating and marking assignments, providing constructive feedback to help students improve their work and grasp mathematical concepts more effectively.
- Demonstrating strong communication skills in explaining abstract mathematical ideas in a clear and relatable manner.
- Tailoring explanations to diverse learning styles, enhancing engagement for both domestic and international cohorts.

Previous Employment (2019 – 2025): Self employed – Mathematics Tutor, Various Gyms – Group Fitness Instructor, Bing Lee – Sales Assistant; Next Gen Health & Lifestyle Clubs – Receptionist Member Concierge; Bathroom Warehouse – Store supervisor and trainer.

EDUCATION

Australian National University (ANU)

Canberra, ACT

Bachelor of Mathematical Sciences with First Class Honours + Bachelor of Statistics

2021 – 2025

- Honours specialisation: stochastic analysis with financial applications (option pricing, hedging, Black–Scholes, Lévy processes); thesis in algebraic topology titled ‘Twisted Topological Hochschild Homology’.
- Coursework in generalised linear modelling, advanced mathematical statistics, Bayesian and statistical inference, stochastic and functional analysis, differential geometry, abstract algebra and topology.

Certifications & Further Training

Microsoft Azure AI Fundamentals AI-901 Certification (Microsoft); Microsoft Excel Expert and Advanced Courses and Power BI Advanced, Intermediate and Beginner Courses (Nexacu); ArcGIS Geographic Information Systems Foundations Course (Esri).

PROJECTS

- **Honours Thesis: [Twisted Topological Hochschild Homology](#)** – 80 page thesis on stable equivariant homotopy theory, deriving new formulas for maps in twisted topological Hochschild homology.
- **Vector Bundles and K Theory Report: [Odd Primary Hopf Invariant One](#)** – Seminar talk extending Steenrod squares to Steenrod powers to give an odd Hopf Invariant.
- **Differential Forms in Algebraic Topology Report: [Applications of Differential Forms to Homotopy Theory](#)** – Report on rational homotopy theory, linking homotopy theory and differential forms through differential graded algebras and minimal models.
- **Stochastic Analysis Report: [Lévy Integration](#)** – Seminar report on Poisson integration, Lévy–Itô decomposition and Lévy stochastic integrals, with worked examples and financial applications (jump diffusion pricing).
- **Stable Homotopy Theory Report: [C₂ Equivariance and KR Theory](#)** – Seminar exposition of equivariant stable homotopy theory and KR theory computations via the slice spectral sequence.
- **Functional Analysis Report: [UMD Spaces](#)** – Expository project on spaces with unconditional martingale differences and applications to stochastic calculus.

ADDITIONAL INFORMATION

- Talks: THH with a “Twist” ([Honours Conference, ANU](#)); What is... G -stuff? (“[What is...?](#)” student seminar, ANU (2025) – seminar co-organiser); The Scariest Maths Topic – “[Maths in the Pub](#)” public presentation (May 2025); Lévy Integration (Stochastic Analysis Seminar, ANU 2024).
- [Caltex All-Rounder Award](#) (2020) for excellence in academic, leadership, sporting and community service activities
- Member of [MENSA Australia](#)
- BSSS Certificate of Excellence for outstanding achievement in physics
- Current ACT Working with Vulnerable People card holder; First Aid and CPR Qualified
- Powerlifting (National amateur competitor)
- Languages: English (native); some Chinese
